

Topic

Implementation of HR-BW

Customer

A real-estate company with investments in prominent cities and economic growth centers in Europe.

Task

- Making available data from the HR module (Personnel Administration [PA] and Payroll [PY]) for reporting in SAP BW.
- Processing the data for flexible analysis.

Implementation

The following activities were carried out by PIKON within the framework of this project.

- IV design (modeling and authorization).
- Unpacking the relevant components in SAP's Business Content (R/3 and BW).
- Creating additional Data Sources in R/3 (e.g. for the extraction of own Infotypes) and data enhancements through a User Exit.
- Data modeling and design in SAP BW (custom InfoObjects and InfoProviders).
- Programming update routines for the processing and enhancement of data.
- Creating process chains to control data extraction from the source system.
- Implementing a role-based authorization concept.
