

Topic

Introduction of SAP BI (BW and Portal)

Customer

Synthomer GmbH, Langelsheim

Synthomer belongs to “Yule Cattsos” business division called “Polymers” and is a global supplier of synthetic polymers in numerous industries.

Task

This project was focused on introducing the SAP Business Warehouse to different areas, such as:

- Margin reporting (SD orders and invoices)
- Revenue evaluation
- Budget evaluation
- Accounts receivable information
- Employees per cost centre

In addition to Excel reporting was setting up the portal for web reporting – an essential component of the project.

Implementation

The following activities were carried out by PIKON:

- Requirements analysis and workshops
- IP design
- Data extraction from SAP R/3 (including the creation of

custom extractors)

- Data modeling and designs in SAP-BW
- Creation of automatic loading processes by using process chains
- Reporting in the Business Explorer Analyzer
- Web reporting in the Portal, including navigation in other reports or directly in the R/3 system
