

Topic

Implementation of a BW report (including historiography) showing slow-moving items (materials that are rarely, if ever, used).

Customer

ENGEL Austria GmbH, Schwertberg, Austria

Task

The goal of this project was to create a historiography from an existing ERP report in the BW. It is not possible to do this in the ERP system.

Implementation

The following activities were carried out by PIKON:

- Design of an IT concept
- Modelling the dataflow (creating the necessary info Providers)
- Implementation of the historiography within start and end routines of the transformation between Info Providers
- Creating process chains for automated data requisition
- Creating web-based and Excel reports
