

Topic

Migrating SAP BW from release 2.1c to release 3.5

Customer

T-Systems Enterprise Services GmbH

Task

Migrating SAP Business Warehouse (Release 2.1c) of T-Systems Enterprise Services GmbH to the BW system of T-Systems International GmbH (Release 3.5). The target system is a BW system landscape with staging and reporting being effected in two different systems.

Implementation

- IV design (modeling) based on the two-system-landscape and the varying states of the releases.
- Support with the design of the test concept.
- Adjustment of data sources in R/3 (e.g. legacy data of PSP elements) as well as data enhancements through User-Exits.
- Data modeling and design in the SAP BW staging system.
- Data modeling and design in the SAP BW reporting system.
- Programming the update routines for processing and enhancing the data.
- Performance optimization in the extraction process.

- IT-support of the implementation of the system tests and the validation of data quality.
- Validity check of the user department.
- Productive system startup support.
