

**Topic**

Support the release change to BI 7.0 (NetWeaver2004s BI) and configuring the BEx Web (Portal Integration)

**Customer**

BMW Group, Munich

**Task**

The main goal of this project was to ensure existing web based BI applications operated correctly after the release change to BI 7.0. Therefore, we tested all areas and adjusted them to work on this new interface. The next goal was to configure the Java components for the portal so the new reporting tool could be used.

**Implementation**

Test all existing applications

Adjust standard function module calls if interfaces were modified

Implement post installations and recording of OSS Notes

Entry of SAP customer messages

Configuration of the portal to integrate BEx-Web:

- Create a SSO connection between the portal and the BI system
- Exchange certificates between the portal and the BI system
- Configuring user mapping in the portal

- Configuring the repository manager

Training user on the new features:

- Formatted reporting
- Portal overview: roles, worksets, iViews/ pages
