

Topic

SAP implementation at Elster-Instromet B.V. Silvolde (the Netherlands)

Customer

Elster Group

Task

Introduce SAP R/3 in logistics, finance and accounting

Implementation

Initial situation

PIKON had already been consulting the ELSTER AG in Germany for some time. At this point in time, the Dutch subsidiary's business processes needed to be migrated to the SAP system of the ELSTER Group.

Design

- Implement the Elster-Instromet N.V. organisational structures in SAP R/3.
- Transfer the master data.
- Implement the procurement, production, sales, quality management, repair and variant configuration processes.
- Implement the accounting and controlling modules.

Realization

- The co-operation between PIKON, the ELSTER IT department and the Elster Messtechnik users resulted in a quick and successful implementation of the project.
- We collated and adjusted the application processes from Elster-Instromet B.V. to those of the ELSTER group.
- Project management
- We customized the modules FI, CO, MM, SD, PP and

QM.

- In order to implement the processes in the field of production we introduced an extensive variant configuration and the valuated make-to-order production.
- Project team and end-user trainings.
- Go-live support.
- After sales support.
