

Topic

SAP implementation at Elster Metering Ltd's site in Stafford (United Kingdom)

Customer

Elster Group

Task

SAP R/3 implementation in logistics, finance, and accounting for their Electricity division.

Implementation

Initial situation

For many years, PIKON has provided consultancy services to ELSTER AG in Germany. Going forward, ELSTER's SAP systems should also map the business processes of their foreign subsidiaries.

Design

- Mapping the organisational structures of Elster Metering Ltd's Stafford site in SAP R/3.
- Mapping the master data.
- Mapping the processes: procurement, production, sales and distribution, quality management, repair and variant configuration.
- Mapping of financial accounting and controlling.

Realisation

- The project was successfully completed by PIKON, with the support of Elster Metering Ltd's I.T. department and users.
- Project management.
- Customising in the FI, CO, MM, SD, PP, and QM modules.

- Mapping of the sales & distribution and production processes, which introduced variant configuration.
- For the mapping of serial number management and production control, an interface to non-SAP systems was programmed.
- Training the project team and end users.
- Transmission of master data.
- Supporting the production start-up.
- Post go-live support.
