

Topic

FI implementation together with a major organizational restructuring at Jungheinrich UK.

Customer

Jungheinrich – UK (part of Jungheinrich group) is a leading supplier of material handling and warehouse equipment worldwide.

The turnover of the Jungheinrich group in Europe in 2003 was 1,4 Billion Euro with 9.200 employees

Task

A rollout of the Jungheinrich SAP template against a backdrop of:

- Decentralizing some of the central roles to the 6 branches.
- Move the head office from Manchester to Milton keynes (replacement of the accounting team).
- Upping the performance of the business unit Service.
- Reduction of outstanding debtor-items.

Implementation

In close co-alliance with the central IT support from Jungheinrich Hamburg PIKON was responsible for looking after the additional local requirements in the area of FI-procedures, Reporting and Non-stock purchasing. As such an important part of the work was put in management-support, creating structured documentation and preparing the go live. Also the transition between the old and the new staff was supported by additional training and month end support.

On top of providing the right amount of job-support in the accounting area PIKON also offered the technical concepts for upload tools and workflow concepts.
